Application No. 10/811,550

LISTING OF CLAIMS

1. (currently amended) A flue liner insert comprising four individual components of sheet material, each component having a cross section that is generally L-shaped with ~~an altered~~ a beveled corner, the components together forming a vertical flue passage, each component comprising adjustable fastening means such that each component is independently adjustable in position with respect to the other components.
2. (original) The flue liner insert of claim 1, wherein the flue liner insert further comprises one or more placement tabs extending at a predetermined height of the flue liner insert.
3. (original) The flue liner insert of claim 2, wherein the upper portion of the flue liner insert has at least one ventilation hole therein.
4. (original) A method of using a flue liner insert of claim 3 to extend and terminate a chimney having an existing flue tile at its top, comprising:
 - a) Inserting the flue liner insert into the existing flue tile at a depth predetermined by the location of a placement tab; and
 - b) Attaching a chimney cap to the upper end of the flue liner insert.
5. (original) A method of using a flue liner insert of claim 2 to extend a chimney having an existing flue tile at its top, comprising:

Response 01, ISS1.002
Application No. 10/811,550

- a) Inserting the flue liner insert into the existing flue tile at a depth predetermined by the location of a placement tab; and
- b) Placing an extending flue tile over the flue liner insert such that it is directly or indirectly supported by the existing flue tile.
